

Colloquium

“Flows and fluxes between science and practice in water management”

Date: 16 November 2012.

Place: **Sala de Juntas, ETSIA – Universidad Politécnica de Cartagena**

Program

9:00-9:15	Peter Droogers	Scientific consulting in water management over the last 10 years
9:15-9:25	Johannes Hunink	“A new base in the Mediterranean basin” - Current activities and challenges for FutureWater in Spain
9:25-11:10	Mayla González Real	<ul style="list-style-type: none">- Research topics of DACRI research group- “Modelling soil CO₂ efflux in irrigated citrus orchards in a semiarid climate.”- “TSEB model. Preliminary results in citrus orchards. “
	Bernardo Martín	“Experiences in monitoring crop and soil”
	Wilco Terink	“How does resolution affect the outcomes of modeling studies?”
	Arthur Lutz	“SPHY model, with examples from central Asia and Chile.”
	Gé van Eerthwegh	“Green Water Credits China, concept and application in China”
	Sandra Garcia Galiano	Research topics of Water Resources R&D Group
	Victoriano Martínez	“Covering water storages to reduce evaporation”
	Jaïrus Brandsma	“Irrigation Potential, the case of the Nile basin”
	Alain Baille	<ul style="list-style-type: none">- “Analogy between greenhouse climate and climate change”- Research proposal on impacts of meteorological extremes on agricultural production
	Walter Immerzeel	“Mountain hydrology, Himalaya”
11:10-11:15	Peter Droogers / Alain Baille	Wrap up
